CLARA rematched 12 × 12 optics: L4H replaced by a drift
VBC 131.69935 mrad · 200,000 identical launched particles · apertures on · no wakefields
Cheetah: second-order tracking
Xsuite: thick-element tracking
Xsuite − Cheetah [percentage points]
Requested σ_y [mm]
Requested σ_x [mm]
Transmission [% of launched bunch]
Difference [percentage points]
Same rematched quadrupole settings in both L4H cases; labels identify requested targets, not achieved sizes.
